

Dr. Lisa Strohman, JD, PhD

Psychologist. Lawyer. Author. CEO.

Dr. Lisa Strohman, clinical psychologist and author, founded Digital Citizen Academy to proactively prevent the negative impact of technology addiction. She works to inform students, educators and parents on how to be responsible digital citizens. She has spent more than a decade working with adolescents and families in her private practice and almost two decades working with schools to address challenges with student mental health and well-being.

In addition, she was a visiting scholar with the FBI and continues to work with law enforcement on safety and cybercrimes involving adolescents to ensure she is also working to ensure her clients are aware of any legal implications at issue and are protected from long term consequences from online activities.

Dr. Strohman holds a Bachelor of Science in Psychology from the University of California, Davis, where she graduated Magna Cum Laude and later earned a PhD and J.D., completing a joint integrated program in Law and Psychology at Villanova and Drexel Universities with Cum Laude honors. She is a member of the American Psychological Association and was past Chair of the APA Committee on Legal Issues.

Dr. Strohman is a frequent speaker with a national platform. She speaks at NGO and non-profit leadership events, corporate events, schools, parent organizations, and business and community groups where she addresses the challenges of raising responsible digital citizens. She is also regularly featured in the media as a technology wellness and behavioral expert. She has been interviewed by TV and radio news outlets and quoted in numerous print publications including Forbes Magazine, Fast Company, and Huffington Post. You can also hear her as a weekly expert guest on Dr. Drew's Midday Live radio show.

DIGITAL CITIZEN ACADEMY

School Programs (K-12)

DCA has developed research-based programs with age-appropriate lessons for students in K-12 designed to educate, empower, and inspire students, educators and families in digital citizenship. Early intervention lessons lay the foundation for teaching younger children how to be responsible digital citizens from the beginning of their school years whereas lessons designed for older students continue to discuss responsible choices for digital citizens and address the dangers and legality of online activities.

Summer Program for Students

Digital Citizen Academy Summer Program wants to take students on an adventure of learning using interactive videos, games and activities. Students will become more familiar with cyber safety, responsible posting, the importance of having a good digital reputation and how to handle tough situations like cyber bullying. The instructor will guide students in "how to" develop a Technology Leadership Council for their school. All students will earn a Digital Citizen Academy certificate!

Diversion Programs

Children make mistakes, especially online. DCA offers an online solution that uses a compassionate and educational solution that address and educate students when they violate school policies. Diversion curriculum addresses violations in the following areas:

- Cyberbullying
- Inappropriate Posting
- Cheating
- Hacking
- Damage to digital reputation
- Gaming
- Technology Addiction
- Vaping

The Diversion Program is available for Elementary, Middle and High School Programs

Technology Leadership Council

The Technology Leadership Council (TLC) is a peer to peer program that is designed with the intent to create social and emotional bonds between council members who participate. Through the TLC students will create project based learning through student led educational campaigns, provide outreach to the broader community, and cultivate an atmosphere that is welcoming, encouraging, and inclusive.

Suggested TLC discussion topics include but are not limited to:

- Digital Citizenship Overview
- Cyberbullying
- Inappropriate Posting
- Digital Cheating/Plagiarism
- Digital Reputation
- Unplugging
- Privacy
